

Testimonial for Portable Carpentry Workshop by Rolling Trades, Inc.

“In a business where time is money, I am always looking to boost productivity (I know, everyone is!), and quite simply, the PCW does that for me. From the moment my PCW came off the truck in Minneapolis, I knew I was getting a durable, first-class piece of equipment and I continue to be shocked at how well thought-out the design is. It works well for any project I tackle and it makes the work done far more efficient- It's hard to imagine having to carry the materials to the tools rather than having the tools next to the work. It saves money and makes us more profitable- I just don't see how we ever worked without it.”
